Tibosomal protein L14, chloroplast - spinach chloroplast
N;Alternate names: ribosomal protein CS-L29
C;Species: chloroplast Spinacia oleracea (spinach)
C;Dapeies: 31-Dec-1990 #sequence_revision 31-Dec-1990 #text_change 09-Jul-2004
C;Accession: S01980; S20560
R;Zhou, D.X.; Quigley, F.; Massenet, O.; Mache, R.
Mol. Gen. Genet. 216, 439-445, 1989
A;Fitle: Cotranscription of the S10- and spc-like operons in spinach chloroplasts and ide
A;Reference number: S01976; MUID:89313684; PMID:2747623
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A,Accession: S01980

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 8, Application US/10344709C
Publication No. US20040170642A1
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Vaccine which comprises at least one antigen and a cathelicidin
TITLE OF INVENTION: derived antimicrobial peptide or a derivative thereof
FILE REPREBRICE: SONN.03008.
CURRENT APPLICATION NUMBER: US/10/344,709C
CURRENT FILING DATE: 2003-02-14
PRIOR FILING DATE: 2001-08-17
PRIOR PILING DATE: 2001-08-17
PRIOR FILING DATE: 2000-08-17

Publication No. US20030188343A1

GENERAL INFORMATION:

APPLICANT: Lynx Therapeutics, Inc.

APPLICANT: United States Department of Agriculture

APPLICANT: Haudenschild, Christian D

APPLICANT: Bowen, Benjamin A

TILE OF INVENTION: Identification of Genes Associated with Growth in Plants

FILE REFRENCE: 37-00510US

CURRENT APPLICANT: 2003-01-07

NUMBER OF SEQ ID NOS: 405

SOFTWARE: PatentIn version 3.1
